

ILC DOVER
creating what's next▶

*next generation technology
for cGMP operations*

G2PAC
The Smart FIBC

G2PAC

The Smart FIBC

Eclipsing the traditional FIBC, the G2PAC is smart engineered to address the issues that arise from uncontrolled processes, including compromised facility cleanliness, cross contamination risks and employee exposure to unnecessary hazards. G2PAC by ILC Dover delivers cGMP operation with containment levels down to 100 µg/m³ on an 8-hour TWA.

■ Features

- Durable ArmorFlex® liner with groundable restraint
- Individual necks with bag-out sleeve to support charging and offloading operations
- 35" cubed size
- Secure, dust-free hardware interface to process equipment
- Sized to interface with standard pallet
- Interfaces with ILC contained separation crimps

■ Benefits

- Economical containment
- Supports dust-free operation
- Reduced cross contamination risks
- Protects operator
- One-person operation

FEATURE	G2PAC
Containment Level	100 microgram
Restraint and Liner	Yes
Charge/Offloading Neck	Yes
ArmorFlex® 104	Yes
Sizing	700 L
Integral Bag-out Sleeves for Contained Changeover	Yes
Interfaces with Contained Separation Crimps	Yes

Our proven powder containment products save our customers millions of dollars by streamlining the manufacturing process, protecting workers, ensuring quality, and helping get drugs to the market sooner.
